

## GSWW Project 308 East Titchberry to Brownsham

Brownsham to East Titchberry is a remote section of the SWCP on the North Devon Coast between Clovelly and Hartland Point with far reaching views across Bideford Bay and over to Lundy Island.

The project brief was to replace old stiles with new 5ft oak gates and surface is necessary. This would provide better access for all. With the installation of these gates, replacing the old stiles it will provide much better access for all who use the SWCP.
