

## **GSWW 330 Link Paths to the South West Coast Path in the Mawnan Smith Area – Durgan and Toll Point**

The project was to repair and resurface two link paths which connect countryside car parks around Mawnan Smith with the South West Coast Path and also to repair and resurface areas at Toll Point. The surfaces of these paths had been badly eroded and rutted and were causing access issues, especially in the winter.

The project has greatly improved the surface condition of these paths. This has been very well received within the local community.

It has cost considerably more than expected due to having to use considerably more materials than anticipated, but we also repaired a little more than originally quoted.

The local ranger on site received many compliments about the work and was able to interact with a large number of local users and regular walkers.
