

## **GSWW 443 Bucks Mill**

Bucks Mills is a remote section of the South West Coast Path on the North Devon coast between Clovelly and Westward Ho! With its far reaching views to Clovelly and Lundy Island. To the west and to the east you can see far beyond the Taw and Torridge Estuary and Baggy Point and on to Exmoor.

The project succeeded in clearing the scrub around and on the hillfort rampart. This would allow the hillfort to be visible to people walking on the South West Coast Path. As well as allowing the hillfort to be visible the work will be helping to protect the ancient monument.
