

At least **1,000** need to be replaced every year

Replacing old steps with new

local hardwood oak or chestnut

is more sustainable, they last longer and mean we don't need to treat them with chemicals that would leach into the ground.

Turn **£10**

For every £10 you donate we could turn it into the equivalent of £25, with the help of our partners.

into **£25**

This could enable us to buy and install one wooden step.

Each wooden step being replaced will be...

6 inches high

to help with those aching knee joints!

The most used steps are not wooden
Luckily they are the harder wearing stone steps between Lulworth and Durdle Door

185

The longest flight of wooden steps can be found on **Salcombe Hill** near Sidmouth

1,000 new steps

will replace 500 ft (over 150 metres) of Coast Path that's taller than **St Paul's Cathedral**

Places associated with steps on the Coast Path are

Sally's Bottom
Bedruthan Steps
Stepper Point
Scratchy Bottom

Do you know where they all are?

That's not counting the many **climbs and descents** where no steps are found
